

# DairyTest Professional

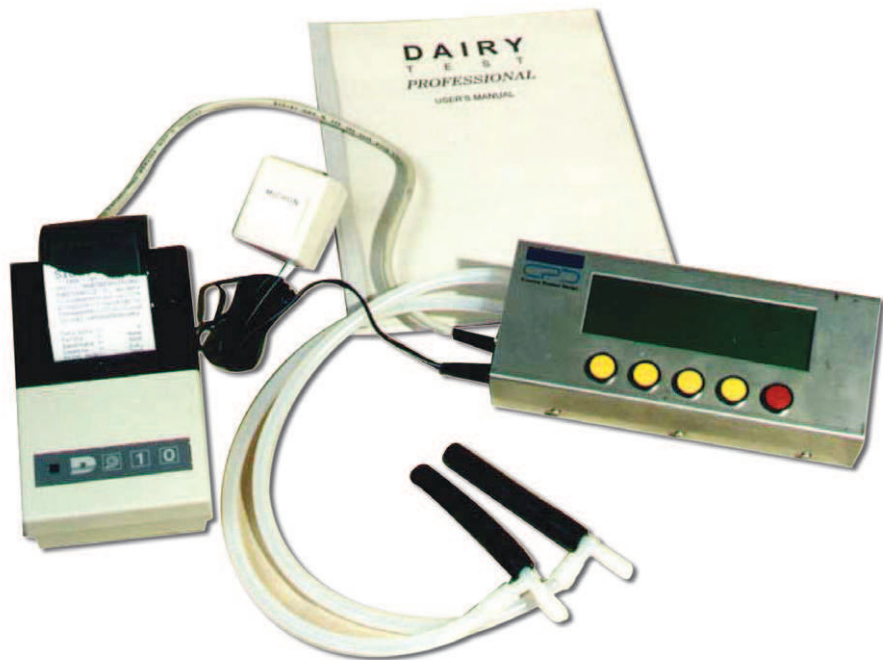

A complete testing system for the professional milking machine technician.

The Pro isn't like other pulsation testers, and for good reason.

We asked professional fitters what they wanted in a test instrument.

And they got the lot:-

- Faster reading
- Bigger screen
- Smaller, more robust and water resistant
- More built-in features: Pulsation, Vacuum, Optical Tacho, Vacuum Chart Recorder
- PC software
- Accuracy
- Longer battery life
- No obsolescence. New features easily updated
- Bigger memory
- International Standards
- Longer warranty (2-year warranty on parts & labour)

No wonder more New Zealand milking machine technicians own a DairyTest Professional than any other brand.
